

Digital Keys for Diesel tankers in BMTC

In a bid to prevent fuel pilferage at bus depots, Bangalore Metropolitan Transport Corporation (BMTC) introduced digital locking system for diesel tankers on 04-07-2019. With the new GPS-based system, diesel transported from Bharat Petroleum Corporation Ltd (BPCL) terminal will be digitally locked. It can be opened at the Depot premises only at a pre-designated geo fencing location. An alarm will be raised if it is operated outside the geo fenced depot. This will reduce fuel theft, adulteration and diversion of the fuel. This first of its kind system is being implemented at BMTC and KSRTC by BPCL. Sri Shankar N K Territory Manager, BPCL handed over the symbolic key to Sri Anupam Agarwal Dir (Security and Vigilance) BMTC.

Thanks and Regards
PRO BMTC.
